

FEATURES

Low light reflectivity
Extremely matte surface

Soft touch

Anti-fingerprint

Thermal healing of
superficial microscratches

CONTEMPORARY ½" FENIX® NERO INGO

FENIX IS CARBON NEUTRAL

When neutrality means to take a stand instead.

Based on the total quantity of square feet sold monthly, FENIX contributes to the reduction of CO₂ emitted into the atmosphere through carbon offsetting projects. To reach carbon neutrality, everything is measured. From the extraction and transport of the raw materials, through the production of FENIX and, ultimately, their disposal, everything is quantified and certified by a third party. Believing in “do more with less,” FENIX focuses on durability and on increasing the bio-based composition of products, guaranteeing their quality while using less resources.

COUNTERTOP
COLLECTION

CONTEMPORARY ½" FENIX® BIANCO KOS

Introducing FENIX NTM®: the innovative, smart material designed for contemporary living. High performance, low maintenance and extremely durable, FENIX is the perfect material for a modern countertop in a kitchen or bathroom.

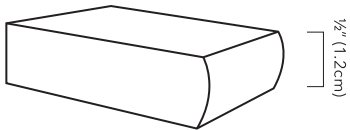

Made using next generation acrylic resins, FENIX countertops deliver extremely low light reflectivity resulting in breathtaking ultra-matte aesthetics. FENIX is made using a proprietary technology that creates a surface which is soft to the touch and anti-fingerprint. The thermal-healing properties of FENIX allow you to repair superficial micro-scratches meaning your FENIX countertops will look stunning for years to come.

FENIX countertops are available in nine colors and two unique constructions – Contemporary ½” and Classic 1-1/8”, allowing you to choose the perfect countertop for your home.

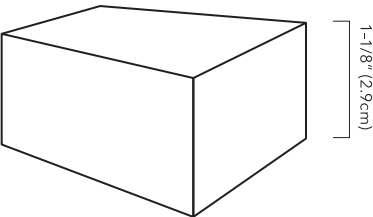

Contemporary ½” FENIX countertops

Solid FENIX is a contemporary top featuring an ultra-modern ½” (1.2cm) profile, offering unmatched style for the kitchen or bath. Made entirely from FENIX, these countertops are highly resistant to heat, impact, waterproof and compatible with undermount sinks.

Classic 1-1/8” FENIX countertops

Bonded FENIX countertops have a classic 1-1/8” (2.9cm) profile. These surfaces are durable, highly resistant to heat, impact and are water repellent.

*Drawings not to scale.

CARING FOR YOUR FENIX COUNTERTOPS

FENIX® surfaces should be cleaned regularly. Clean with just a damp cloth with warm water or a mild detergent. Regular household cleaning products or disinfectants can be safely used. Use a non-abrasive cloth.

For older, dried or caked-on stains, use a magic sponge or soft cloth to remove them.

Always rinse thoroughly to remove the detergent with clean, warm water.

Search for **FENIX Maintenance and Cleaning** on fenixforinteriors-na.com to learn more.
